SOLUTION BRIEF

Health

Simplify operations.
Automate business practices.
Drive connectivity.

In the faster, smarter, and increasingly complex world of healthcare, FJA's Product Machine Platform provides an easier way to build, configure, and manage complex insurance products.

With FJA's cloud-enabled, modular platform, you can:

- Engineer products with easy-to-use table structure.
- Manage product portfolio and lifecycle with complementary product rules and guardrails.
- Provide product data from centralized repository through flexible APIs.
- Utilize version control for full traceability and auditing.
- Track activities across all aspects of the platform with configurable workflows.
- Integrate easily with other FJA solutions or enterprise applications.

Insurance Products Built for Today, Prepared for Tomorrow

From regulatory changes to evolving cost-drivers, there are always new challenges in the health insurance industry.

At FJA, it's our mission to provide our clients with the tools they need to stay ahead of the curve. Our configurable solutions enable insurers to adapt to changing market dynamics and efficiently integrate new technologies as they emerge.

"Our offerings stand out because they address an insurer's current pain points while remaining flexible to resolve challenges that pop up in the future."

-Joe Wilds, Chief Growth Officer at FJA-US

Meet the FJA Healthcare Solution Suite

Design, maintain and distribute plans with the **Product Builder**.

Streamline operations so you can manage all aspects of your benefit plan data to get to market quickly with confidence.

Enable product & plan pricing with the **Rating & Pricing Engine**.

Drive significant improvements in productivity and accuracy by automating your rating and pricing process and reducing risk exposure.

Streamline and accelerate CMS filings with the **Submission Engine**.

Use with the Product Builder to streamline and accelerate plan filings and ensure data consistency across your plan data and CMS filings, including MA and QHP.

Power all underwriting operations in a single application with the **Underwriting Workbench**.

Let your team focus on the art of underwriting and risk management instead of administrative and manual processes.

Capture, maintain and expedite all aspects of group data with the **Case Installer**.

Leverage flexible configuration, drive efficient integration across multiple systems and simplify year-over-year renewals.

Generate and manage documents with the **Doc Engine**.

Integrate document generation seamlessly into your ecosystem for a wide range of document types, ensure compliance, and allow customization to meet your business needs.

Facilitate the integration of benefit and claims data with the **Benefit Coder**.

Connect benefit detail with your claims system for efficient and accurate claims processing, when paired with Product Builder.
