

# Simplify treaty management. Reduce data errors. Improve reinsurer relationships.

*Say goodbye to cumbersome spreadsheets and overly complex software.  
FJA's Reinsurance Solution provides a smarter, more efficient  
way to manage treaties.*

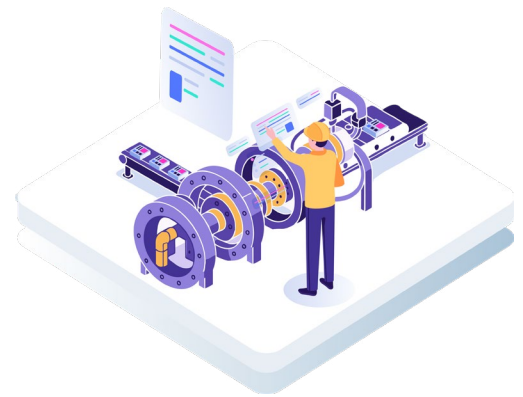

## With FJA's modern reinsurance solution, you can:

- Eliminate spreadsheet-based treaty management.
- Reduce data issues and errors associated with manual calculations.
- Manage multiple treaty types and calculate premiums across treaties

## Manage all your reinsurance treaty processes with a single end-to-end solution.

Handle onboarding, data exchange, premium processes, claims process, reporting and compliance in one easy-to-use platform.

Insurance carriers offering group products often have numerous reinsurance programs. Finally, there's an easy way to manage all of these programs with a single tool.

*"The biggest pain point is the ability to configure and streamline with their reinsurance partners based on specific parameters and processes. We realized that out-of-the-box options don't address this challenge. So, we created this reinsurance solution with the customer experience in mind and leveraged our current technology to enable it."*

—Joe Wilds, Chief Growth  
Officer at FJA-US

## See How FJA Is Simplifying Reinsurance

### Streamline Treaty Management

- Centralized repository for treaty terms and amendments
- Automated treaty versioning and audit trail
- Support for multiple treaty types (YRT, Coinsurance, ModCo, etc.)

### Leverage Data Integration
